

PEEL (peelable heat shrink tube)

The heat shrinkable tube PEEL brings simplicity to catheter construction. Thanks to a simple linear tear, this heat shrinking tube PEEL can be removed easily after usage. That helps much in saving time during the construction of catheters and other neurovascular applications. Due to the transparent fluoropolymer the catheter construction can be easily inspected after reflow process.

Standard applications: balloon tacking, catheter lamination, tube bonding, tube forming

Product facts of PEEL medical tubes

- Up to 2:1 shrink ratio
- Very easy to peel – peelable
- Working temperature to +200°C (392°F)
- Recovery temperature of +215°C +/- 10°C (420°F +/- 18°F)
- Smooth catheter surface finish

Specification and approvals

- USP Class 6 approved
- ISO 10993-4 and ISO 10993-5

Sizes in mm
